Main advantages of water heaters and hot water storage tanks

Crystal Enamel®

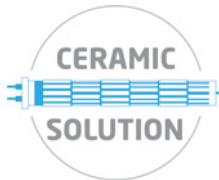

DZD water heaters and hot water storage tanks are protected inside by a unique Crystal Enamel anti-corrosion coating developed in cooperation with the German company Wendel. This layer is hygienically clean and therefore suitable for permanent contact with drinking water. Unlike the stainless steel, Crystal Enamel is resistant to pitting corrosion in the environment of hard and chlorinated water.

Thermo Gen®

Thermogen4 is the fourth generation of our exclusive insulating foam, which has been developed in cooperation with the company of Covestro, for attaining the most optimal heat- loss coefficients. The key here is a unique mixture tailor-made for our heaters. Its qualities are in line with all current and future trends in the field of heaters. It excels both in its insulating qualities as well as its shape integrity. Moreover, we are one of the first manufacturers in Europe able to meet the strictest ecological requirements of the EU, and thereby significantly contribute to protecting the atmosphere and the environment.

Ceramic Solution®

The Ceramic Solution electrical heating unit is exceptionally resistant to hard and aggressive water and significantly extends the life of the water heater and storage tank under any conditions. This ensures the long-term stable performance of the heater system due to reduced limescale. DZD is a pioneer in this water heating solution; they have been using it in their products for over 50 years.

- New flat heater in models 20–120
- Suitable for installation in restricted areas, it can be built in the kitchen line
- Quick water heating due to the concept of two vessels
- It combines the traditional DZD technology and modern design
- Possible alternatives to the replacement of the gas heater
- The option of purchasing 2 multipurpose holders (order number 102000703)
- New flexible wall hinge available (4 mounting buttons) and new AC power cable – ready for standard AC plug

- Electric water heater combining the best available technologies
- Contains self-learning Smart Control Unit for optimisation of consumption, saving up to 15% on expenses.
- Can be controlled using DZD smartphone app (Android/iOS).
- Smart HDO function (low tariff): the heater recognizes the low tariff in electrical network.
- Independent diagnostics of malfunctions, e.g. status of protective anodes
- Can be used as a classic heater
- Can be plugged into any socket without temporal or other control

OKCE 2/6 kW, 2/4 kW

ELECTRIC WATER HEATERS
Wall-mounted vertical

- Comes in wall-mounted version
- With 2/6 kW or 2/4 kW heating modes
- 2/6 kW models are equipped with a rapid water heater
- Can use surplus electricity from solar panels
- Rapid heating can be activated remotely by an external switch by the 2/6 models

* – according to connection method

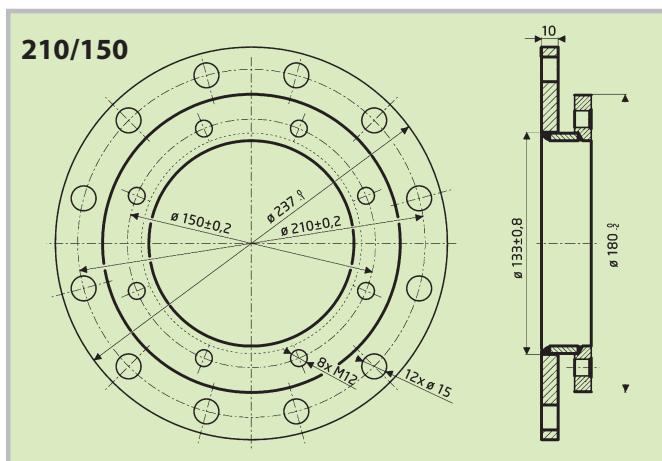

Extension lengths are in a tolerance of ± 10 mm.

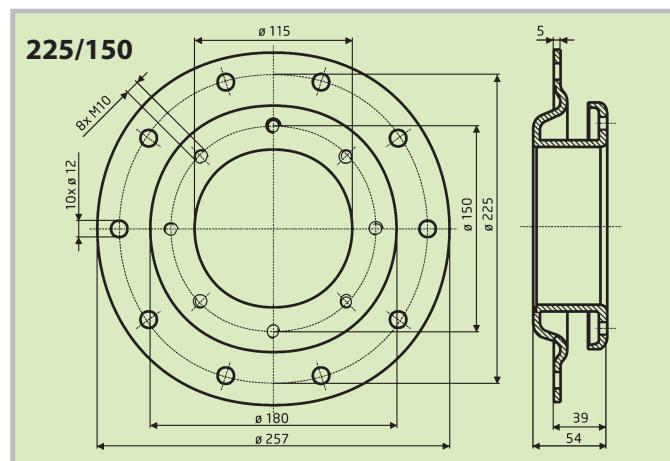

Reduction flanges

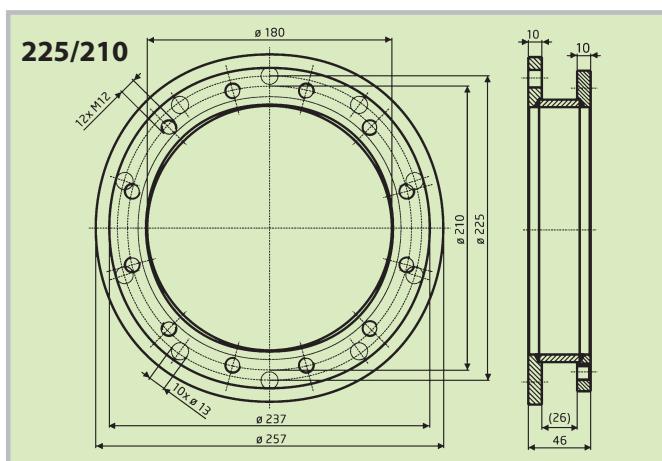

- REU, RDU and RSW electrical heating units can be assembled in the OKCE 160–500 S, OKC 300, 400, 500 BP water heaters using a 210/150 reduction flange.

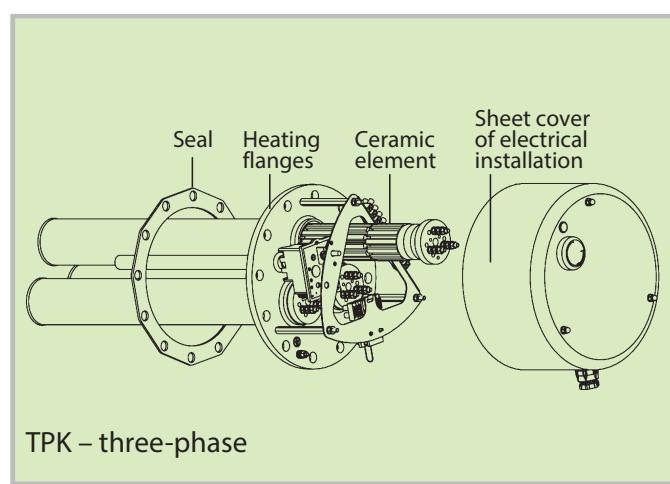

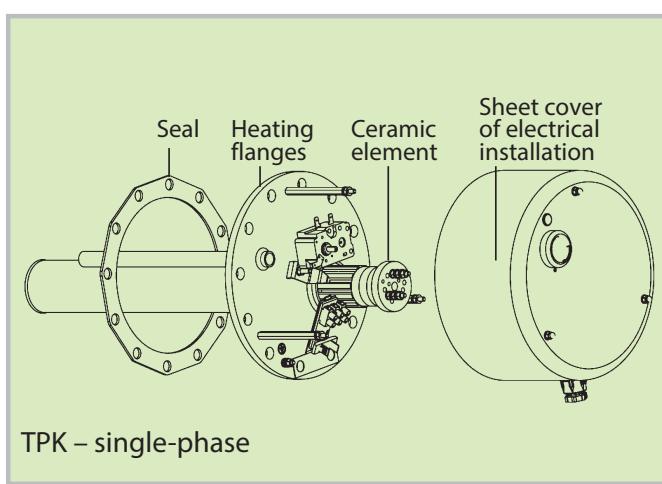

- REU, RDU, RDW and RSW electrical heating units can be assembled in water heaters with capacities of 750 and 1000 litres using a 225/150 reduction flange.

- TPK 210 - 2.2 kW and TPK 210 - 12/3-6 kW, TPK 210 - 12/5-9 kW and TPK 210 - 12/8-12 kW electrical heating units can be assembled in water heaters with capacities of 750 and 1000 litres using a 225/210 reduction flange.

Composition of single- and three-phase TPK heating flange units

Box of thermoregulation KR

- Indirect-heating water heaters are equipped with sensor pockets to place the sensor from an external source (solid fuel boiler, solar controller, heat pump, etc.). The KR thermoregulation box can be used in installations which cannot be controlled by a control unit from an external source; the KR box controls the external source or its switching elements (e.g. a three-way valve). The switching temperature can be set at between 5–74 °C. The water heater tank is equipped with sensor pockets with an internal thread of M 12 x 1.5 for the installation of the controllers' sensors.

KR	KR-230 V
Order number	2113000
Voltage	230
